

RcX Clamp

RIX Retaining Clamp

RIX is our light retaining type clamp for fixing of pipes, hoses and cables.

Due to a thick rubber profile it is very good to dampen vibrations and other movements.

The RIX is available in 12 mm bandwidth, and several materials from zink plate to different stainless steel grades so you can find the perfect combination to fulfill the requirement of the application. Different type of materials in the rubber profile such silicone, EPDM, PP is available as option, especially if in contact with oil, high temperature or need of special characteristics. Standard is EPDM. Ideal applications are in automotive, marine, hydraulic and industry.

RsX DIN Retaining Clamp

RsX is our strong retaining type clamp for fixing of pipes, hoses and cables, complying with DIN 3016.

Due to a thick rubber profile it is very good to dampen vibrations and other movements.

The RsX is available in 9, 12, 15, 20, 25 mm bandwidth, and several materials from zink plate to different stainless steel grades so you can find the perfect combination to fulfill the requirement of the application.

The bolt holes are reinforced with an extra plate to better resist vibrations.

Different type of materials in the rubber profile such silicone, EPDM, PP is available as option, especially if in contact with oil, high temperature or need of special characteristics. Standard is EPDM.

Ideal applications are in automotive, train, aviation, marine, hydraulic and industry.

Bandwidth 12 mm (9, 15, 20 & 25 mm available on request)

CCT House Scandinavia AB

With a long experience in the clamping & connecting industry and cooperations with global actors, CCT House understood that in today's rapid changing market, there was a need of a partner that really could supply the right parts for the customer's needs. And sometimes there is a need of unconventional products that has not even been produced before. That's why CCT House not only supplies what we produce. Having different levels of quality/performance for better complying with the asked performance, helps our customer to do significant cost savings and get the right product for each application. With that said, we do not compromise with the product quality itself, all of our products are produced according to ISO9000/ISOTS16949 and comply with relevant standards.

You can really trust that CCT House always deliver the right quality and performance level.

CCT House have the widest range of clamping and connecting products for almost all levels of demand. Products that fulfill the customers requirements with the right performance level and at the same time, save costs without risk of getting low quality.

Contact us, our team is ready to serve you.
